DETAILED ACTION

Information Disclosure Statement

1. The IDS filed February 5, 2004 is a duplicate of the IDS filed September 8, 2003. The IDS filed February 2004 was initialed while the IDS filed September 2003 was lined through, to avoid duplication of references in the issued patent.

Allowable Subject Matter

2. Claims 1-31 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art does not anticipate the narrow scope of the claims, a scope which only encompasses a particular product line with a unique number and arrangement of I/O connecting means for that product line.

While one could theoretically attempt to set forth that some or all of the claims are not patentable under 35 USC 103 as there being no unexpected result from the claimed I/O arrangement(s), applicant *does* explain that the particularly claimed I/O arrangements constitute "an advantageous set of external interfaces for home video game platform" that "provide modularity and expandability *while maintaining and preserving the proprietary nature of the platform*" [abstract].

The proprietary nature of the gaming platform can be preserved because the claims narrowly define in scope particular I/O arrangements of a particular game platform, which, by the power of the patent system, can be a basis for preventing an unauthorized gaming peripheral (that can only work with the particular game platform) from being manufactured, used or sold.
